No Foreign-going Vessel is included which has not been so reported within four years, and no Home Trade Vessel which has not been reported within one year. It is possible that some Vessels may be included which have ceased to exist or are no longer employed as British Vessels, but every endeavour is made to ascertain and strike off such Vessels.

With respect to the Crews, a very small deduction ought to be made for the case of men who join a fresh ship immediately on their discharge from the former one, which happens to remain in Port.

Note.—The decrease in the Number of Persons committed for Trial in England and Wales, since 1855, is partly to be attributed to the operation of the Criminal Justice Act of 1855, which authorizes Justices to pass sentences for short periods, with the consent of the prisoners, instead of committing for Trial to the Sessions.

TO THE RIGHT HONOURABLE THE LORDS OF THE
COMMITTEE OF PRIVY COUNCIL FOR TRADE.

MY LORDS,

I HAVE the honour to submit to your Lordships the Agricultural Returns for Great Britain for the year 1867, the details of which have been collected, as in the previous year, by Officers of the Inland Revenue Department.

The agency of the Post Office was largely used by the Officers of Inland Revenue for the transmission of the Forms for obtaining from the Occupiers of land the information desired.

The Returns for 1866 are also published with those for 1867; but the difference between the results for the two years cannot always be taken as the actual variation in the Acreage under Crops and Grass, and in the number of Live Stock.

In 1866 the Acreage Returns were only collected in Great Britain from Occupiers of and above *Five* acres of land, which was considered to be a limit low enough to include all land used for agricultural purposes.

In 1867 as the Acreage and Live Stock Returns were both collected at the same time, it was necessary, in order to ascertain the number of the Live Stock, to abandon the limit of five acres, and to collect the returns of both Acreage and Live Stock from *All* Occupiers of land.

The Acreage Returns were collected in the month of June in 1866 and 1867, but the total Acreage returned in 1867 is much increased for some Counties by additions made to the Acreage under Permanent Pasture. These additions are chiefly occasioned by the introduction of the word "Down" into the heading of the column for Permanent Pastures in the Forms for 1867; and the substitution of the words "exclusive of Heath or Mountain Land" for "exclusive of Hill Pastures." Under the latter exception, as used in the Returns for 1866, it is believed that a large acreage of Down and other hilly grass land was not returned. It was not intended that such kinds of grass land should be excluded, but only large tracts of Mountain Land with heathy and scanty pasture.

The collection of the Acreage Returns from Occupiers of less than five acres has also led to an increase in the Acreage under Permanent Pasture in 1867.

The variations in the Acreage under "Bare Fallow," as returned for the two years, are partly owing to misconceptions or mistakes in some districts as to the land that should have been returned under that head.

The Acreage under the several Corn and Green Crops may be taken as showing very nearly the extent of the land cultivated, with these crops in 1866 and 1867.

The differences in the Returns of the number of Live Stock, especially as regards Sheep and Pigs, arise to a large extent from the unavoidable collection of the Returns at two different periods of the year, the 5th of March in 1866 and the 25th of June in 1867 ; but the exceptionally high prices of Sheep and Pigs in 1866 had also an effect in increasing the number of Sheep and Pigs in 1867.

The heading of the column for "Cows" has been altered in the Returns for 1867 to "Cows and Heifers in Milk or in Calf," which is partly the cause of the increase in the number of Cows in 1867. The Cows kept in Towns for Dairy Purposes are included in the Returns for 1866 and 1867.

The Total Number of Occupiers of Land and Owners of Live Stock from whom Returns were obtained is stated in the Returns for 1867, and the Average of the Acreage returned by each Occupier has been computed, and is also published. This average, however, is not equivalent to the average extent of the Farms occupied, as the Acreage under Woods, Plantations, &c. is not included in the Returns.

The Returns for 1867 have been carefully examined, with the view of affording correct data of comparison with subsequent years. This examination, entailing frequent references to the collecting officers in different parts of the country, has prevented the earlier publication of the Returns.

The Acreage Returns for 1866, as now published, have been corrected in consequence of the discovery of errors in the Returns for Wheat in Suffolk, and for Turnips and Swedes in Devonshire.

The Returns for the year 1866 were largely circulated in the agricultural districts for the purpose of making known the informa-

tion afforded by the Returns, and also of showing that nothing was published which could in any way injure the interests of individual Occupiers of Land.

If the forms issued at the time of collecting the Returns be carefully filled up by the Occupiers of Land, the state of Agriculture will be ascertained, year by year, and in the course of a few years valuable facts will be upon record to show the variations in the cultivation of the soil, and the number of Live Stock kept in the country.

For Scotland and Ireland there are previous Returns which can be compared with the Returns for 1866 and 1867; and the following Table shows the changes during the last ten years in the cultivation of the principal Crops, and in the number of Live Stock in those parts of the Kingdom.

I have the honour to be,

My Lords,

Your Lordships' most obedient Servant,

A. W. FONBLANQUE.

AGRICULTURAL STATISTICS, IRELAND,

1866.

TO HIS EXCELLENCY JAMES, MARQUESS OF ABERCORN, K.G.,
&c., &c., &c.

LORD LIEUTENANT-GENERAL AND GENERAL GOVERNOR OF IRELAND.

MAY IT PLEASE YOUR EXCELLENCY,

I had the honour of submitting on the 18th ultimo a Return of the acreage under flax in 1865 and 1866, by counties and provinces. I now beg to submit to your Excellency General Abstracts which give for the same years the area under each description of crop; also the number of Horses, Cattle, Sheep, and Pigs. The emigration from Ireland, during the first seven months of 1865 and 1866 is also given.

The collection of the Statistics commenced on the 1st of June and occupied about eight weeks. It was as in former years entrusted to the Constabulary and Metropolitan Police, who, to the number of nearly 4,000, acted as Enumerators with their usual efficiency. They visited about 600,000 separate holdings during the progress of the inquiry, and obtained from the occupiers, or some person in their employment, the acreage under each crop, the number of live stock, and other particulars stated in the Returns.

The Abstracts are compiled from summaries made by the Enumerators for their respective districts, and may differ slightly from the *revised* figures hereafter to be published; I do not, however, apprehend that any change likely to affect their value for general purposes will be necessary.

The total acreage under all Crops this year was	5,519,678 acres.	Extent

Making a *Net Decrease* in the area under all Crops of 128,725

Although the foregoing statement shows a decrease of 128,725 acres in the *total* extent under crops in 1866, there was an increase in the extent under "grass" to the amount of 210,425 acres, and a diminution in the area under "bog and waste *unoccupied*" of 86,664 acres. Woods and plantations also show an increase this year, and fallow a decrease.—*See Table, page 5.*

The following Abstracts exhibit the acreage under each crop in 1865 and 1866, and the increase or decrease in the latter year:—

Total *Decrease* in the extent of *Land under Crops* in 1866, 128,725

* In the Flax Returns published on 18th August, the *total increase* of that crop was given as 11,986 acres, the exact area under flax in the Sub-District of Newtownbreda, County of Down, amounting to 1,325 acres, had not, however, been received at that date.

It will be perceived from the Abstracts (*pages 8 to 13*) that there has been this year a small increase in the acreage under wheat in almost every county, amounting to 33,485 acres; and that of the "Cereals" and "Green crops," oats and potatoes are still, as formerly, the most extensively grown,—occupying respectively 1,697,648 and 1,050,419 acres.

The extent under Crops, Grass, Fallow, Woods and Plantations, and Bog and Waste *unoccupied*, in 1865 and 1866, are shown by Provinces in the following table:—

When submitting to the Lord Lieutenant the General Abstracts for 1865, I ventured to observe with reference to the large increase in the number and value of Live Stock in that year:—"We may confidently hope that, with a recurrence of such favourable seasons

as the present, the value of Live Stock will soon reach the large amount (£35,368,259) it had attained prior to the 'Hay Famine' in 1859, by which, and the excessive rains of the three following years, the number of Stock and the Agricultural prosperity of Ireland in general were so injuriously affected;"—it is now very satisfactory to find that the Estimated Value this year amounts to £35,178,040; and I beg to say there is at present great cause for thankfulness to a merciful Providence that Ireland has hitherto been almost entirely free from the distressing ravages of the Cattle Plague, by which almost every county in England and Scotland has so deeply suffered.

It appears by the Returns that there is a decrease this year in Leinster in the number of "Cattle under one year old," amounting to 12,058; this may be in some degree accounted for by the operation of the Order in Council of 25th August, 1865, prohibiting the removal of Cattle from Great Britain to Ireland, thus preventing, since that date, the usual importation of "Calves" into the ports of Dublin, Drogheda, and Dundalk, which I am informed on reliable authority has been considerable, particularly to Dublin, for some years. The decrease of 1,648 in the number of "Cattle under one year old" in Ulster may perhaps also be attributed to the operation of the same Order in Council.

It is, however, to be borne in mind that the subject of the Ages of Horses, Cattle, Sheep, and Pigs—more especially in an inquiry extending to upwards of *ten millions* of animals—must necessarily be one of much difficulty, and inaccuracies as to age, no doubt, in many cases occur; still the classification by ages, as given in the Returns, is of value if it affords even a reasonable approximation to accuracy.

Emigration.

The Returns obtained by the Enumerators at the several Irish ports show that during the first *seven* months of the present year (ending 31st July last) 74,195 persons emigrated, being an increase of 11,933 persons, compared with the same period in 1865. The table containing the number of Emigrants for 1865 and 1866, is given at page 20, by Months and Provinces.

I have the gratification of stating to your Excellency that, with only a few exceptions, the particulars of Tillage and Live Stock were readily communicated to the Enumerators by the resident Landed Proprietors and Tenant Farmers of every class—to whom, as also to the Clergy of all denominations, and the Public Press, I now beg to repeat my respectful acknowledgments for the valuable assistance which I continue to receive in connexion with these important Statistics.

I have the honour to be

Your Excellency's very faithful servant,

WILLIAM DONNELLY,

Registrar-General.

Note.—Some difference existed in the mode in which the Returns received from the Bombay Presidency for the Years since 1853 were compiled as to numbers of Native Vessels Entered and Cleared. It is presumed that in the earlier Years every Craft, however small, must have been included, and that subsequently only Vessels of certain Tonnage appear, so as to account for the great difference in the figures.
